DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

I. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Gandolfo (US 2003/0224787 A1).

1. Regarding claim 1 – Gandolfo discloses defining a node in a piconet to be a piconet controller having controller functions, and locating a rigid body seed including the node, and discovering a rigid body by sequentially downloading controller functions of the piconet controller to at least one border node, refer to Figures 5 and 6 and paragraphs [0041], [0042], [0050], [0051], [0063], [0069], [0072], [0074], [0093], Gandolfo discloses merging piconets to form scatternets to allow peer-to-peer communication. Gandolfo discloses locating a piconet and piconet controller and joining a piconet and becoming a piconet controller.

Allowable Subject Matter

Claims 18-21 are allowable over the prior art.

Claims 2-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1. Salonidis et al. (US 6,865,371 B2) discloses a method and apparatus for connecting devices via an AD HOC wireless communication network.
